

Stays on. Uniquely conforms.

- Flex Technology provides excellent flexibility¹ and conformability to avoid early detachment²
- Proven to handle more exudate* than other all-in-one foam dressings³
- Test shows that Mepilex® Border Flex releases up to 22 times less bacteria than other dressings⁴
- Exudate Progress Monitor lets you objectively track and record exudate⁵, potentially avoiding excess dressing changes
- For use on a wide range of exuding chronic and acute wounds
- Also available in Oval shape for greater clinical choice

*In vitro studies.

Flex Technology – stays on and conforms

- 360° flexibility
- Improves comfort⁶⁻⁸
- Minimises risk of detachment²
- Stays on better than other dressings*^{9,10}
- Reduces skin stress⁶⁻⁸

*On knees and elbows compared to other square dressings.

Highly breathable backing film

- High moisture vapour transmission rate for longer wear time³
- Exudate Progress Monitor lets you track and record exudate progress⁵
- Allows you to check colour of exudate
- Works as a barrier against bacteria¹³
- Water resistant so your patients can shower¹⁴

Retention layer

- Effectively manages both normal and viscous exudate¹¹
- Traps exudate containing bacteria¹²
- In combination with the spreading layer and backing film, contributes to the dressing's high moisture vapour transmission rate¹¹

Bacteria trapping

The 5-layer construction of Mepilex® Border Flex works to absorb, channel and trap exudate containing bacteria away from the wound bed and prevent re-entry, even under compression¹²

Spreading layer

- Distributes exudate over a wide surface area to maximise exudate transport to the retention layer and backing film¹⁵

Foam layer

- Absorbs exudate and transports it to the spreading layer³

Safetac® wound contact layer

- Minimises pain at dressing changes¹⁶ and reduces risk of maceration^{17,18}
- It's easy to handle – and you can remove the dressing without damaging the skin¹⁶
- Safetac® also protects new tissue – so wounds remain undisturbed to support undisturbed healing^{17,19,20}

Mepilex® Border Flex

Mölnlycke®

Designed to conform and stay on

Our proprietary Flex Technology creates great conformability, and a dressing that is more flexible than comparable bordered foam dressings¹. A dressing that moves with the patient and stays on even in the shower¹⁴. Gives more time back to nurses to focus on care, not unscheduled dressing changes.

Smart exudate management

The 5-layer dressing absorbs, channels and traps exudate and allows you to track exudate progress. Keeping exudate away from the wound bed, and preventing re-entry, even under compression¹². It has better exudate handling capacity than comparable dressings³ and can handle both normal and viscous exudate¹¹.

Reduced pain and damage

Our proven Safetac[®] technology means less pain¹⁶ and damage¹⁶ during dressing changes, and reduced risk of maceration than traditional (adhesive) dressings^{17,18}.

Areas of use

You can use Mepilex[®] Border Flex to treat a wide range of exuding chronic and acute wounds such as diabetic foot ulcers, venous leg ulcers, pressure ulcers*, skin tears and traumatic wounds. It may also be used as part of a prophylactic therapy to help prevent skin damage, e.g. pressure ulcers.

Being available in square, oval and rectangular shapes, it can be used on a wide range of wounds and considered as your 'go to' all-in-one dressing.

*Where a repositioning or offloading protocol is used.

Note: In the case of signs of clinical infection, consult a healthcare professional for adequate infection treatment.

Easy application

Our new proprietary three-part release liner makes it easy to apply Mepilex[®] Border Flex**²². So you can place your dressings accurately and securely – avoiding wrinkles, rolled edges and re-applications. Which could save time and reduce waste, too.

**Available in square 15 x 15cm, 15 x 20cm and Oval 13x16 and 15x19

Mepilex Border Flex is available in Oval shape because wounds are not square and at times a special shape might be just what you need for that secure fixation.

Ordering information (sterile packed)

Square

Order number	Size (cm)	Size (inch)	Dressings per pack
595211-50	7.5 x 7.5	3 x 3	10
595311	10 x 10	4 x 4	10
595011	12.5 x 12.5	5 x 5	10
595411	15 x 15	6 x 6	10
595611	15 x 20	6 x 8	10

Note: Please contact your local Mölnlycke representative for information about order numbers available in your country.

Oval

Order number	Size (cm)	Size (inch)	Dressings per pack
583500	7.8 x 10	3.1 x 4	5
583300	13 x 16	5.1 x 6.3	5
583400	15 x 19	6 x 7.5	5
