

## Media backgrounder: Mepi™ Press 2 & Mepi™ Press 2 Lite Compression System

New two layer solution designed to personalize compression therapy for venous and mixed etiology conditions

The new **Mepi™ Press 2 Compression System**, from Mölnlycke Health Care, is a multi-layer solution designed to deliver tailored, consistent compression therapy across a wide range of patient needs. **Mepi™ Press 2 and Mepi™ Press 2 Lite** allow clinicians to choose the appropriate compression level while maintaining a unified application method and patient-friendly design.

The Mepi Press 2 Compression System offers two single-use solutions each built on the same intuitive two-layer system. Mepi Press 2 offers standard compression of 40mmHg and Mepi Press 2 Lite offers reduced compression of 30mmHg. Both products feature an **easy-to-use stretch indicator** printed on the outer brown cohesive bandage, guiding clinicians to achieve accurate, consistent compression.

### Benefits to clinicians

The system enables clinicians to:

- Scale compression levels based on patient diagnosis, **ABI range**, and tolerance.
- Indicated for both **venous disease and edema** requiring standard compression, as well as **mixed-etiology leg ulcers** requiring reduced compression.
- Maintain the same familiar application technique across both products for streamlined training and improved consistency.

### Supporting Venous Leg Ulcer (VLU) Management

The Mepi Press 2 Compression System is part of Mölnlycke's broader approach to venous leg ulcer care. By pairing with **Mepilex® Up**, a thin, highly absorbent foam dressing for both high volume and thick exudate, and **Granudacyn® Wound Wash Solution**, clinicians can clean wounds and manage exudate while delivering the appropriate level of compression. Granudacyn supports a clean wound bed, Mepilex Up supports exudate management, and Mepi Press 2 provides consistent compression therapy - all providing an environment for wound healing.

### Product ordering

Mepi Press 2 and Mepi Press 2 Lite Compression Systems are now available through Mölnlycke Health Care US and authorized distribution partners nationwide. <https://www.molnlycke.com/en-us/>

### Mölnlycke comment

*"The Mepi Press 2 Compression System reflects our mission to provide clinicians with simple, reliable products that adapt to a patient's evolving needs. By pairing Mepi Press 2 and Mepi Press 2 Lite, we are delivering a complete, flexible compression solution aligned to modern wound care realities."* Suzy Carpenter, Senior Marketing Director, Wound Care, Mölnlycke Health Care US
